Real-world jazz training with performance & theory.

Meet new students who share your passion for creating and playing fun music and develop your improvisation & practical music theory skills, while building your song repertoire and learning interesting music history stories.

Beginning to advanced sections will be offered for grade 7 - Adult instrumental and vocal students (Depending on the number of students enrolled and their playing levels). Students will have an extensive hands-on opportunity to explore & develop their improvisation, communication, and group teaming skills. Students will be featured in a student concert Saturday, August 10th.

Requirements: Students must know the notes on their instrument, be able to read music, and play the major scales. Students must attend all classes and perform in the student concert. (except in case of sickness or family or national emergencies).

The **beginning section** is for students who have little or no experience in improvising or playing jazz. Learning to play the blues song form and blues scales will be stressed. Students will

play the blues in a variety of keys and rhythmic feels. This course will focus on developing the basic skills students need to improvise including:

- Interval Recognition
- Knowledge of basic scales and the major scale modes
- Knowledge of basic chord structures
- Blues song form
- Rhythmic feels
- Song repertoire

The **intermediate/advanced sections** are for students who have past experience improvising in a school group or the AJW beginning class. They need to prove via a level placement audition, they have mastered the basic skills covered in the AJW beginning class listed above and can solo over the blues form. These sections focus on soloing over more advanced song forms, chord changes, and rhythmic feels.
